COLIBRÌ

NECTA HAVE DONE IT AGAIN - THE APPLIANCE OF SCIENCE TO VENDING!

Necta are proud to present the Colibri, which is a fully automatic table top drinks machine with 150 cups in a footprint of only 410 mm x 490 mm. Now even the smallest office locations can enjoy the experience of real continental drinks such as espresso and cappuccino directly from the coffee bean to your cup.

INSTANT SATISFACTION

From a wonderfully whipped cup of hot chocolate to a decadently smooth frothy cappuccino, the instant model of the Colibri will satisfy your thirst for drinks of the highest quality.

SUPERIOR TEA

The Colibri leaf tea is fitted with an espresso style brewer, rather than the traditional freshbrew method, which uses pressure to ensure maximum extraction of flavour from the tea. A wide variety of teas can be used, including speciality teas, as the paperless brewing system is less limited to leaf size.

ESPRESSO TECHNOLOGY

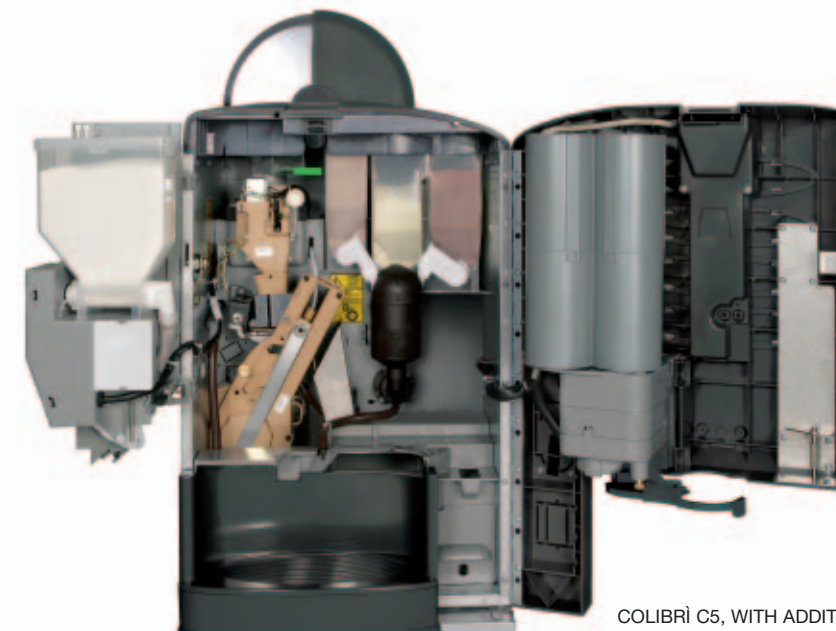

Espresso (bean-to-cup) models of the Colibri are fitted with the patented Necta brewer, which ensures optimum extraction from the coffee beans. This means that you can enjoy a truly aromatic, full-bodied espresso with a long lasting foamy crème.
